

nikolatsolovfan.com - Session Handoff v2

Comprehensive context dump for the next Claude session. Hand this PDF over and the new session will know exactly where the project is.

Generated: 25 May 2026 (in-universe date). Real-world conversation logged in this session covered design, SEO, articles, Bulgarian translation, mobile optimization, performance fixes, and Race 3 (Montréal) updates.

Project basics

- **Site:** nikolatsolovfan.com (GitHub Pages, custom domain).
- **Subject:** Nikola Tsolov (Cyrillic: **НИКОЛА ТСОЛОВ**), Bulgarian F2 driver, Campos Racing #6, Red Bull Junior Team. Nicknamed 'The Bulgarian Lion'.
- **Main file:** /index.html (English homepage, ~6,300 lines).
- **Bulgarian version:** /bg/index.html (full translation).
- **Articles:** /articles/ (index) + /articles/nikola-tsolov-career-timeline/ + /articles/nikola-tsolov-f1-seat-2027/.
- **Sitemap:** /sitemap.xml with all 5 URLs and hreflang.
- **Calendar:** /nikola-tsolov-f2-2026-calendar.ics (downloadable, all 14 race weekends).

Current F2 2026 standings (after R03 Montréal, with Tsolov's 10s penalty applied)

- P1 - **Gabriele Minì** (MP Motorsport) - 57 pts - 1 win (Miami Feature)
- P2 - **Rafael Câmara** (Invicta Racing, rookie) - 36 pts
- P3 - **Nikola Tsolov** (Campos #6, rookie) - **35 pts** - 2 wins (Melbourne FR, Miami SR)
- P4 - **Martinius Stenshorne** (Rodin, rookie) - 35 pts (Tsolov ahead on countback)
- P5 - **Noel León** (Campos, rookie) - 33 pts - 1 win (Montréal SR)
- P6 - **Laurens van Hoepen** (Trident, rookie) - 33 pts
- P7 - **Alexander Dunne** (Rodin) - 30 pts
- P8 - Beganovic (DAMS) - 24 - P9 Miyata (Hitech) - 22 - P10 Dürksen (Invicta) - 16
- **Tsolov race results so far:** Melbourne SR P17 / FR P1 (WIN) | Miami SR P1 (WIN) / FR DNS (1st-lap contact) | Montréal SR P14 / FR P12 (P4 on road, dropped to P12 by 10s track-limits penalty) - **zero points from Montréal weekend**
- Championship gap: Tsolov is now **-22 points behind Minì**

F1 2026 lineup (memorize - we got this wrong once)

- Red Bull Racing: **Verstappen + Hadjar** (Hadjar promoted Dec 2025)
- Racing Bulls: **Lawson** (3rd year, 12 pts after R3) + **Lindblad** (British rookie, signed Dec 2025, 4 pts after R3)
- Reserve driver (both teams): **Yuki Tsunoda**
- Lindblad outpaced Lawson in pre-season testing per Planet F1 / F1 Oversteer
- Helmut Marko: officially retired end of 2025 but still texts Tsolov personally (sourced from GPblog May 2026)

Current site structure (after aggressive cuts)

After this session's 'Option A' cleanup, the homepage has 11 main sections (down from 20). Removed: Fan Poll, Quote Feature, Facts Section, Quiz, Helmet & Livery, Season Map. CSS/JS for removed sections also fully cleaned up.

- 1. Topbar (slim 3-item nav 2026/Standings/Articles + lang switcher EN-BG + hamburger). On mobile the slim nav hides; switcher + hamburger stay visible.
- 2. Result banner (P12 Montréal, P3 in championship, -22 to Minì)

- 3. Hero (TSOLOV letters + 'the bulgarian lion' nickname + meta fields)
- 4. Stats grid (4 numbers)
- 5. Race recaps (R01 Melbourne, R02 Miami, R03 Montréal - expandable cards with stats + lap chart + Technical Takeaway)
- 6. Bio (compressed to 2 paragraphs) + 'Full feature' callout + F1 Super License Points Tracker
- 7. Career timeline (visual)
- 8. Season tracker (countdown + session schedule with result pills + calendar + follow card + .ics download)
- 9. Standings (card-based design with team-coloured avatars, trophy icons next to wins, Tsolov row red-themed)
- 10. Head-to-Head (Tsolov vs Mini)
- 11. Championship chart (4 rounds, 5 drivers' points progression)
- 12. Gallery (8 images)
- 13. Video highlights (3 YouTube embeds)
- 14. News (7 cards with NewsArticle schema)
- 15. Share strip + Ko-fi + Footer with 'About this site' block + social icons

Everything shipped in this session

SEO & Structured Data

- FAQPage schema with 13 Q&As (English + Bulgarian)
- NewsArticle schema added to each news card with itemprop microdata
- Article schema on both article pages with BreadcrumbList
- Event schema fixes: endDate + image added to all 14 race events
- Hidden H3 SEO headings on key sections
- Updated meta description + keywords (EN + BG)
- Organization schema with sameAs (FB / X / Instagram socials)
- hreflang tags bidirectional EN <-> BG
- Confirmed: 19 valid items in Rich Results Test (Articles 8, Breadcrumbs 1, Events 14, FAQ 1, Videos 3)
- Page 1 ranking for 'Nikola Tsolov stats' confirmed live

Articles created

- **Article #1:** /articles/nikola-tsolov-career-timeline/ - ~1400 words, byline 'Nikola Tsolov Fan - editorial', Article+Breadcrumb schema, factbox + blockquote + related-reading block
- **Article #2:** /articles/nikola-tsolov-f1-seat-2027/ - fact-checked with web research, includes Racing Bulls scenarios, Marko angle, media consensus section. **This article has 18.5% CTR in Search Console — the highest of any page.**
- Articles index page at /articles/ with card listing

Bulgarian version /bg/

- Full homepage translation: ~250 strings translated via Python scripts
- Translation tone: casual; brand names kept English (Campos Racing, Red Bull Junior Team, FIA Formula 2); ■■■■■■ ■■■■■■ used in body / Nikola Tsolov in URLs
- **Russo One** font added as Cyrillic display fallback (Orbitron has no Cyrillic glyphs - fixed the 'ugly heavy block letters' issue)
- Language switcher placed in topbar.right (visible on mobile alongside hamburger)
- schema.org inLanguage: 'bg-BG' on BG WebPage
- OpenGraph + Twitter cards localized
- Sitemap.xml updated with hreflang annotations
- BG canonical URL: nikolatsolovfan.com/bg/

Mobile optimization

- Defensive html/body overflow-x: hidden + max-width: 100vw (fixes horizontal scroll)
- Hero image object-position: 75% 35% on mobile (keeps lion's head visible on portrait)
- Mobile hero animation override (heroImgRevealMobile - final opacity 0.7)
- Recap cards: header stacks vertically, stats row scrolls horizontally
- New <=480px tight breakpoint (section paddings, fonts, button sizes)
- Articles pages: dedicated mobile rules at <=600px and <=380px
- Language switcher moved OUT of nav INTO topbar.right (always visible)
- News headline font: changed from Orbitron 900 to Titillium 700 (less heavy in Cyrillic too)

Performance fixes (post-Lighthouse)

- Before: Mobile Performance **61**, Desktop 96, SEO 100, Best Practices 100, A11y 90
- Hero CLS fix: scanline animation switched from 'top' (layout) to 'transform: translateY' (compositor); min-height on hero text containers to absorb font-swap shift

- Hero image: 64.6 KB → 57.7 KB, resized 1376x768 → 1100x614, HTML width/height updated
- Removed all dead CSS from removed sections (~700+ lines)
- Defensive try/catch in initAll deferred work
- Fixed 'tick t is not defined' JS error (a broken i18n call) that was blocking renderNews
- Expected post-push Mobile score: ~80+

Design cleanup (Option A aggressive cut)

- Removed: Fan Poll, Quote Feature, Facts Section, Quiz, Helmet & Livery, Season Map
- Removed all associated CSS (~700 lines) and JS (renderCircuitMap, QUIZ_DATA, poll logic)
- Nav links to #poll, #quiz removed
- Standings table redesigned as card-based layout (team-coloured avatars, trophy icons, gold 'leader' glow)
- Win count moved from grid badges into trophy icons next to points

Race results / live tracking

- Live-tracked R03 Montréal during the weekend: FP, Quali (P4), Sprint (P14), Feature (P4 on road -> P12 after 10s penalty)
- Updated everywhere: result banner, news cards (4 added), recap card with new Technical Takeaway, standings (full top 10 rewrite), Head-to-Head, points chart, Super License tracker, session schedule with result pills
- All references to 'championship lead' / 'P2' / etc updated to reflect Tsolov is now P3

Other shipped wins

- Footer 'About this site' E-E-A-T block (EN + BG translations)
- Last Updated timestamps on Standings + both Articles (with proper <time datetime> tags + dateModified in schema)
- Internal linking: bio -> career article ('Full feature' callout)
- .ics calendar download with all 14 R weekends
- F1 Super License points tracker (25/40 pts shown - 2025 F3 P2 valid, 2022 F4 expired)
- Image SEO renames: 12 files renamed from generic names (Racing_car_*.webp etc) to SEO-friendly slugs
- Social icon links in follow-card sidebar (FB / X / IG for the fan page)
- Article #1 fact-check: corrected 2026 F1 lineup (Hadjar promoted, Lindblad rookie at RAC, Tsunoda reserve)

Search Console snapshot (as of 25 May 2026)

- Homepage: **10 clicks / 375 impressions** - 2.7% CTR
- F1 seat 2027 article: **5 clicks / 27 impressions** - **18.5% CTR (highest of any page - this is your hot one)**
- Career timeline article: 1 click / 92 impressions - 1.1% CTR
- Articles index: 0 / 6
- Bulgarian /bg/: 0 / 4 (just launched)
- Confirmed ranking: page 1 for 'Nikola Tsolov stats'

Pending — what to do next

Immediate (after user pushes to GitHub)

- Submit /bg/ URL in Search Console -> URL Inspection -> Request Indexing
- Resubmit sitemap.xml (now has 5 URLs with hreflang)
- Re-run Lighthouse on mobile (expect 80+)
- Run Rich Results Test on /bg/ (verify Bulgarian FAQ + Article schema)
- Search Console -> International Targeting -> verify hreflang has no errors after a few days

F1 seat article enhancement package (the 'A/B/C/D bundle' we discussed)

Goal: take the 18.5% CTR article from 27 impressions -> 200+ in 2-4 weeks. User was deciding whether to do all four or just images.

- **(A)** Add 2 inline images to the article (Tsolov in Red Bull livery + a Racing Bulls / grid shot)
- **(B)** Add 2-3 more H2 sections (e.g., 'What happens to Tsunoda?', 'How would a 2027 line-up look?', 'Could Tsolov get an F1 test?')
- **(C)** Add FAQ section at bottom with FAQPage schema (4-5 Q&As)
- **(D)** Internal link from homepage (e.g. inside Super License tracker block) to the F1 seat article
- Recommendation: do all four together (the 'C bundle'). User was choosing between A only or full C bundle.

Articles still to write (todo list from earlier)

- Article #3: 'Tsolov vs Câmara - the F2 2026 title fight'
- Article #4: 'Bulgarian motorsport history - from rallies to F2 wins'
- Article #5: 'Campos Racing vs ART Grand Prix - why Tsolov returned to Campos'
- Article #6: 'How Tsolov broke the F3 all-time wins record'

Other backlog items discussed (not started)

- Bulgarian translation of the articles themselves (still in English only)
- RSS feed (/feed.xml or /articles/rss.xml)
- PWA manifest + service worker
- Author/About page (currently footer block only)
- Newsletter signup
- Gallery lightbox + share-per-image
- More backlinks (Bulgarian press, F2 fan accounts)
- Move to Cloudflare Pages or Netlify (proper cache headers, ~5-10 pts more on Lighthouse)

Design redesign discussion (parked)

- User asked about brutalist redesign. My recommendation: **park it for 2-3 months**, gather audience data first, then decide. Current cinematic/F1-broadcast aesthetic is actually working.
- If revisited: get 2-3 reference sites from user first; editorial/print style is the safer middle path vs pure brutalist

Key decisions made this session

- Aggressive cut Option A (6 sections removed) over Option B (3) or C (compress only)
- Bulgarian tone: casual, brand names kept English, Cyrillic for body text, Latin for URLs
- Language switcher placement: topbar.right (visible always, mobile-friendly)
- Russo One added for Cyrillic display fallback (NOT changed entirely; Orbitron stays primary for Latin)
- Author byline: 'Nikola Tsolov Fan - editorial' (pen name, not real)
- No-affiliation disclaimer included in footer About block (E-E-A-T signal)
- Forbidden words list applied: no 'amazing/incredible/shocking/delve/unlock/embark'
- Stick with GitHub Pages for now (cache-lifetime issue noted but not blocking)

Gotchas to remember in the new session

- **Today's date is 25-26 May 2026** (not 2024). Universe is real-world 2026 motorsport season.
- Bulgarian site is in subdirectory /bg/ - all relative image paths inside JS arrays must be resolved to absolute (/) for it to work. The fix is already in place in renderGallery and renderNews.
- F2 Sprint scores top 8 (10/8/6/5/4/3/2/1); Feature scores top 10 (25/18/15/12/10/8/6/4/2/1). Fastest lap = 1 bonus pt if top 10.
- FIA Super License: 40 points required. F2 P1/P2/P3 = 40 each. F3 P2 = 25. Points expire after 3 years (Tsolov's 2022 F4 +12 already expired).
- Hero font cascade: Orbitron -> Russo One -> Impact (Russo One only kicks in for Cyrillic glyphs)
- Cinematic animations on hero (TSOLOV letter-by-letter, nickname colour-by-word, meta fields cascade, scanline) are part of the brand identity - don't strip without warning user
- All news cards now use article element with itemprop microdata (NewsArticle schema). Don't break this template.
- The user is a Bulgarian fan, not a developer. Keep explanations practical. Use Bash/Edit tools heavily.

How to start the new session

- User will hand you this PDF. Read it before making changes.
- User's immediate question was: do the A/B/C/D enhancement package on the F1 seat 2027 article. Confirm with user which scope they want, then execute.
- Don't re-research things already verified in this session (2026 F1 lineup, Super License rules, current standings). Trust the data in this PDF.
- If user mentions a screenshot or shows new data, treat that as fresh ground truth (e.g. if standings have changed by next race weekend).
- Project root: C:\Users\tombata83\OneDrive\Documents\GitHub\nikolatsolovfan

End of handoff. [Save this file and attach to the new Claude session.](#)
